

ThisIsSanti.dev

Visual & Brand Direction

A unified visual language for the personal engineering brand of Santiago. This manual consolidates the approved direction across Home, About, Skills, Portfolio, Certifications, Project Detail and Contact.

Direction

Modern technical · Human · Confident · Consistent

Version 1.0 · 2026

Brand Direction

CORE IDENTITY

POSITIONING

Personal engineering brand, not a generic developer portfolio

ThisIsSanti.dev should communicate engineering depth, product thinking and attention to detail. The visual system should feel modern and technical without becoming a stereotypical hacker aesthetic.

ENGINEERING

Architecture, scalability, clean implementation.

PRODUCT

UX, UI, usability and real-world outcomes.

CRAFT

Precision, consistency and polished details.

Brand principles

Less decoration, more intention. Strong hierarchy. Consistent spacing. Subtle motion. Real evidence over generic claims. Every visual element must improve clarity, identity, trust or interaction.

Visual System

COLORS · TYPOGRAPHY · COMPONENTS

Core palette

Deep Space
#07101D

Open to new opportunities

My journey

2019 – 2020

Started my career

I began my journey as a Frontend Developer, focused on building responsive and interactive web interfaces.

2021 – 2022

Growing & learning

Expanded my skills to Backend Development and started building full stack applications with modern technologies.

2023 – Now

Building impact

Working on complex projects, leading initiatives and helping businesses turn ideas into powerful digital products.

What drives me

These are the principles that guide my work and decisions.

Clean Code

I write maintainable, scalable and efficient code following best practices.

User Focused

I design and build experiences that are intuitive and solve real user needs.

Problem Solver

I enjoy solving complex problems and turning challenges into opportunities.

Continuous Growth

I'm always learning new technologies and improving my skills to stay up to date.

I believe great software is built at the intersection of design, engineering and empathy. My goal is to build products that people love to use.

MY SKILLS

Technologies I work with

Over the years I've worked with a wide range of technologies and tools. These are the main ones I use to build scalable, modern and high-quality digital products.

Download Resume

Skills overview

Technologies, tools and platforms I use to design, build and ship products.

Frontend Development

Building interactive, responsive and accessible user interfaces with modern frameworks.

ReactNext.jsTypeScriptJavaScriptHTML5CSS3

Backend Development

Creating robust APIs, business logic and backend systems that scale.

Node.jsExpressGraphQLREST APITypeORMSQL

Databases

Designing, modeling and maintaining efficient and reliable data structures.

PostgreSQLMySQLMongoDBRedis

DevOps & Cloud

Deploying, monitoring and scaling applications in the cloud.

AWS DockerCI/CDNginx

Tools & Workflow

Tools that help me code, collaborate and ship faster.

GitGitHubVS CodeJira

Other Technologies

Additional technologies and libraries I use depending on the project.

SassTailwind CSSMaterial UIBootstrapReduxZustandJestCypressFigmaPostmanJWTESLint

5+ Years of experience

20+ Projects completed

10+ Happy clients

100% Commitment

CONTACT — reference concept

Implementation Rules

CONSISTENCY ACROSS THE APPLICATION

01 Navigation

Keep the same navbar structure, active state, spacing and authentication controls across every page.

02 Background

Use the same star-field treatment and deep blue/purple space gradient. Avoid introducing unrelated backgrounds.

03 Cards

Use rounded translucent/dark surfaces with subtle borders. Cards should organize content, not overwhelm it.

04 Accent

Cyan is the primary interactive accent. Purple is the secondary identity accent. Green is reserved for availability/status.

05 Content

Prefer concise, evidence-based copy. Avoid generic claims such as 'passionate developer' unless supported by context.

06 Responsive

Desktop and mobile must share the same visual language while using layouts optimized for each viewport.

07 Motion

Use short, purposeful transitions. No continuous animations that compete with content.

08 Accessibility

Maintain readable contrast, visible focus states, keyboard navigation and reduced-motion support.

Visual QA Checklist

BEFORE SHIPPING

- Navbar is visually identical in structure across pages.
- Active navigation state is clearly visible.
- Background gradient and star field remain consistent.
- Typography hierarchy is consistent.
- Card radius, borders and spacing follow the design system.
- Cyan / purple / green accent roles are respected.
- Primary CTAs are visually obvious and consistent.
- Project imagery uses the same treatment and proportions.
- Mobile layouts preserve hierarchy and usability.
- Animations are subtle and do not distract from content.
- No unsupported metrics, testimonials or claims are presented as facts.
- All interactive elements have hover, focus and disabled states.
- Accessibility and reduced-motion behavior are verified.

Final direction

The site should feel like a premium personal engineering product: technically credible, human, visually distinctive and easy to navigate. Preserve the existing space-inspired identity, but make hierarchy, consistency and professional presentation the priority.
